Genetic (Mitochondrial) Eve

You have cell DNA (hair color etc).

Cell DNA comes from mom and dad.

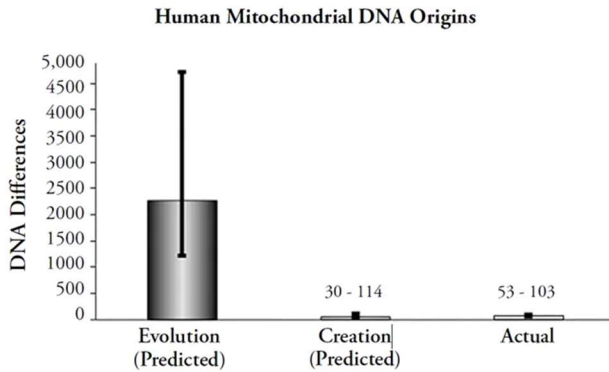

Your mitochondria have their own mtDNA, but it only comes from mom.

Studies on mitochondrial DNA show we all come from 1 mom.

Scientists say that Mitochondrial Eve lived about ~200,000 years ago.

1 mtDNA mutation every 6 generations

There have been 53-103 mutations (in various populations)
